

AerForm[®] LHR Cleanability & Stain Removal

Technical Bulletin

July 2020 • Page 1 of 1

Schneller has engineered AerForm[®] LHR to be highly cleanable. Laboratory tests confirm that these products are resistant to staining agents and will not fade or streak; even after heavy cleaning. Because of the wide variety of staining agents an aircraft interior is exposed to, the type of cleaning agent may vary. (Ketone based solvents will damage the surface of AerForm[®] LHR.)

Stain Removal – Easy (Wet-cloth only)

- Nonabrasive cloth moistened with water

Stain Removal – Mild (Soaps, Detergents)

- Household detergent (Lestoil) followed by clear water rinse.
- Cloth or soft bristled brush/little pressure to prevent polishing of stained area.

Recommended Cleaning Agents

- Water
- Lestoil
- Formula 409
- Isopropyl Alcohol
