

AerTrim™ LW

General Information

June 2020 • Page 1 of 1

AerTrim LW is a light-weight, integrally colored fiberglass-reinforced product. It is engineered for areas where panel abuse is expected. Ideally suited for flat or single-contoured parts, AerTrim LW can be wrapped around parts with a radius of 1/8 inch (3.2mm).

Product Features

- Integrally colored base provides excellent damage resistance and panel protection; helps to minimize the appearance of scratches and damage.
- Thermoplastic resin system that is more flexible than other fiberglass-reinforced products, making it much easier to cut and handle, and allowing for easy edge wrapping.
- Stain/solvent-resistant face resulting in a cleanable and durable product.
- Seemingly unlimited custom color and design availability is ensured and backed up by Schneller's well-equipped and experienced Design and Color Matching staffs.

Product Specification

- Complies with 65/65/200 heat release rate and smoke density requirements.
- Qualified to:
 - Airbus Industries Specification AIMS 04-09-002
 - Boeing DMS 2389

Product Information

- Available form:
 - Continuous rolls - Width: 60" (1.5m). Typical roll size is 60-80 yds (55-73m)
- Adhesive options:
 - Pressure-sensitive PSLHR adhesive
 - No adhesive. Can be applied using commercially available contact adhesives.

Possible Applications

Aisleways	*Doghouses	*Dividers/Partitions/Windcreens
Bulkheads	*Flight deck doors	*Carpet risers/Dado panels
*Closets	*Galleys	Lavatory walls-exterior* and interior
*Crew rests		Meal cart sides and doors

*AerTrim LW with PSLHR adhesive is PMA-certified for application
